

### AVAILABLE DRIVE OPTIONS

External pneumatic winch  
Integrated pneumatic drive systems

Using its proven pneumatic drive technology, Protea has developed a range of pneumatically driven transportation trolleys to allow the safe and efficient transport of equipment in hazardous offshore environments.

This includes both self propelled trolleys for maximum versatility and units with external winches for transporting large loads over long distances.

Delivered to meet specific customer requirements, units have previously been supplied for handling coiled tubing equipment on FPSO's and are fully compliant with the latest ATEX regulations.

EXTERNAL PNEUMATIC  
WINCH AND CONTROL PANEL
